

Café Scientifique

The Mind Museum,
with the British Council and Fully Booked,
presents:

UNDERSTANDING DARWIN A CONVERSATION WITH DR. STEVE JONES

(Evolutionary biologist and geneticist)

Two hundred years after Charles Darwin's birth,
his idea of natural selection has been widely accepted
by the scientific community.

So what's the big deal behind all this?

Join us in a videoconference to ask Dr. Steve Jones:

**WHY IS DARWIN'S IDEA SO POWERFUL?
DOES LIFE REALLY BELONG ONLY TO THE STRONG?
WHAT DOES DARWIN'S IDEA MEAN FOR US TODAY?**

Join us to understand.

Saturday, 25 April 2009, 4:30 – 6:00 PM
The Forum, 3/F Fully Booked, Bonifacio High St.
Bonifacio Global City, Taguig

(This event is free and open to the public. Limited seats. RSVP: cafesci.manila@gmail.com)

Dr. Steve Jones is a Professor of Genetics at University College London and a Trustee of the British Council. He has published several science books for the public including *Darwin's Ghost* (2000), *The Descent of Men* (2003) and his latest, *Darwin's Island* (2009). He is also the recipient of many awards, including the Royal Society Faraday Medal for the public understanding of science.

Café Scientifique is moderated by **Mitzi Borromeo**.

This event is also supported by Krispy Kreme Doughnuts.
